Publication: NDSP4/011/09/2019
FOREWORD

The NDSP4 Publication series is an attempt to bring some of our key reports and consultancy reports to our stakeholders and a wider audience.

The overall objective of the Niger Delta Support Programme (NDSP) is to mitigate the conflict in the Niger Delta by addressing the main causes of the unrest and violence: bad governance, (youth) unemployment, poor delivery of basic services. A key focus of the programme will be to contribute to poverty alleviation through the development and support given to local community development initiatives.

The NDSP4 aims to support institutional reforms and capacity building, resulting in Local Government and State Authorities increasingly providing infrastructural services, income generating options, sustainable livelihoods development, gender equity and community empowerment. This will be achieved through offering models of transparency and participation as well as the involvement of Local Governments in funding Micro projects to enhance impact and sustainability. Specifically, 863 community projects are expected to be implemented as part of the EU support to community development in the Niger Delta.

By the end of August 2019, some 690 out of the 863 micro-projects had been completed and accepted.

In addition, under the NDSP4 Service Contract, 330 uncompleted projects were taken up under an addendum No.1 to the contract (mpp9) and successfully completed 302 by the end of December 2017; the remaining 28 were carried over to NDSP4 Works contract-2.

Kingsley Fossu
Team Leader – NDSP4
PROGRAMME OVERVIEW

NDSP Component 4 (NDSP4)
NDSP4 is an extension of MPP9 and is building on its achievement, focusing on focal communities and capable and reform-minded Local Government authorities. This component is implementing micro-projects co-funded with Local Governments, which will contribute to building the capacity of local governments in service delivery to the poor and to strengthening the partnership between Government authorities and communities. By implementing Micro-Projects in a wide range of communities, the programme aims to improve the delivery of social and economic services and to sensitise communities to demand good governance through the community participatory planning and development.

NDSP4 includes allowance for community-based action in support of conflict prevention/management or addressing other issues of relevance to the affected communities, including environmental improvements.

The Objective of NDSP Component 4 is to support local communities' development initiatives and conflict alleviation by completing the 9th EDF MPP9 project, which has a financial shortfall. Expected results to be achieved are:

Result 1: Strengthened Community Governance through adoption of Community Development Action Plans by Communities and Local Government authorities.
Result 2: Increased equitable access to basic infrastructure services by women and men.
Result 3: Increased equitable access to income generating options and sustainable livelihood development by women and children.
Result 4: Improved social cohesion among village communities.

Management Structure
The MBNP, represented by the National Authorising Officer (NAO), is the FGN implementation agency and is supported by the following management structure:
• National Project Steering Committee (PSC)
• State Level Project Stakeholders Coordination Committee (SLPSCC)
• Project Implementation Management Unit (PIMU):
• Implementation Field Offices (IFOs)
• Micro-Projects Implementation Committees (PICs)
Funding Arrangement
The funding arrangement was based as follows:

- Total EU Funding: €45,000,000.00 (for works/Services)
- European Union: €25,905,000.00 (50% for works)
- LGAs: €12,952,500.00 (25% for works)
- Communities: €12,952,500.00 (25% in kind)
- States: To facilitate, coordinate and monitor projects.

Micro Projects Categories
Menu of proposed micro projects under NDSP-C4 include:

- Basic Water Supply and Sanitation infrastructure,
- Health Centres,
- Educational Infrastructure,
- Civic Centres/Town Halls and
- Income Generating Infrastructure (Palm Oil Mills, Cassava Mills)
- Open and Lock-up Markets, etc.

NDSP4 Achievement and Challenges So Far
Below are Achievements of NDSP4 since its inception in January 2014:

- Completion of the 9th MPP9 project under NDSP4 Additional Services contract with over 90% completion rate.
- Facilitated the successful selection of NDSP4 LGAs and communities with the support of the nine ND States.
- Sensitisation of key stakeholders on NDSP4 for awareness creation and seamless participation.
- Establishment of SLPSCCs & PICs in the nine ND States and communities for programme coordination, implementation and sustainability.
- Successful procurement of works contractors (Lots 1 to 9) for construction of over 860 MPs via Works Contract 1 and Works Contract 2 in the nine ND States with high success in contract execution.
- Preparation and Implementation of Programme Estimate 1 to facilitate full participation of key stakeholders (Communities, CSOs, State and LGA officials, etc.) in NDSP4.
- Implementation of a robust visibility and communication action plan to create programme awareness and information dissemination via production and distribution of NDSP4 vis-
ibility materials and promotional items (brochures, folders, jotters, Tee shirts and Caps, pens etc.).
• Development and regular update of NDSP4 website with mobile application software for upload of events and progress of work during field missions.
• Widening the scope of NDSP4 visibility via creation of NDSP4 Facebook account and Twitter handle.
• Capacity building of State, LGA and communities on procurement, project monitoring, management, operation and maintenance of water and agro processing mills.
• Commissioned study and publication of key stakeholders’ engagement on the sustainability of provided micro projects facilities.
• Main challenge is late commencement of construction work and delay by LGAs in the discharge of their counterpart contribution.

Related Programmes/Donor Activities in ND
There are similar initiatives in the Niger Delta region funded by the EU and other international donor agencies that are targeted towards alleviating poverty and conflict. The donors and agencies include CIDA, UNDP, DFID, WHO, USAID etc.

WORKS CONTRACT OVERVIEW

NDSP4 WORKS CONTRACT & CONSTRUCTION PROGRESS.

1) Overview of NDSP4 Works Contracts (Works Contract-1 & Works Contract-2)
The NDSP4 works contracts are construction contracts comprising buildings and water projects. They are micro projects of basic standards. Building project; The walls are made of sand Crete block and the surface is rendered with cement-sand mortar finishing. The roof structural members are wood covered with long span aluminium roofing sheets finished with wooden fascia boards. The ceiling sheets are cements fibre materials. The windows are made of aluminium casement and the doors are made of metals with transom. The floor is finished with cement / sand mortar screeded on a concrete damp proof course (DPC) except health center buildings which are finished with tiles. The walls and ceilings are painted with emulsion paint. Water project; The water project is a basic standard motorized bore-hole powered by solar energy. The tank stand is a steel structure with base plate bolted to concrete foundation footing with anchor bolts. The water tanks are plastic tanks with in-let and out-let units for water supply and distribution services. The solar power system is automatic in operation with the CU200 panel. This system is protected against thunder by proper earthing system. The water distribution point is constructed with block and concrete structure with three battery taps units. The projects types include; solar powered motorised borehole, school block, health post, civic center, market stall, cassava mill and palm oil mill.

NDSP4 Works Contract 1 (WC1) & Works Contract 2 (WC2); A total of 863 numbers of community projects were planned to be implemented as part of the EU support to community development in the Niger Delta. Of these, 579 projects were awarded in 9 Lots in the first tranche as Works Contract -1 (WC1). A total of 254 projects were also awarded in 8 Lots for the second tranche as Works Contract – 2 (WC2) except in Cross River State where a balancing 30 projects are yet to be awarded under WC2. These have been achieved through offering models of transparency and participation as well as the involvement of States in coordination and Local Governments in funding Micro projects to enhance impact and sustainability.

Outstanding MPP9 construction completion activities; Micro Projects Programme in the Nine Niger Delta States (MPP9) was the preceding programme before NDSP4. The outstanding part of uncompleted works in MPP9 was awarded to the consultant as addendum to their contract to provide supervision activities for the remaining MPP9 projects that were not completed during the life span of the programme. When the addendum contract (NDSP4-Addendum No.1) ends in June 2017, there were still residual of MPP9 construction activities not completed. The NDSP4 main part has technically provided supervision services for the MPP9 residual works since June 2017. The works done on the residual of MPP9 construction completion activities are clearly outlined.

MPP3, MPP6 and MPP9 Inventory Documentation: Additional activities of inventory documentation of MPP3, MPP6 and MPP9 have been added to NDPS4 assignment as part of its deliverables. Experts have been fully mobilized to site on the 18th June 2019 to commence these activities in the Nine Niger Delta States. The result of this assignment will provide detailed data of all completed projects under Micro Projects Programme in the Three Niger Delta States (MPP3 – Bayelsa, Delta & Rivers), Micro Pro-
jects Programme in the Six Niger Delta States (MPP6 – Abia, Akwa-Ibom, Cross River, Edo, Imo & Ondo) and Micro Projects Programme in the Nine Niger Delta States (MPP9 - Abia, Akwa-Ibom, Bayelsa, Cross River, Delta, Edo, Imo, Ondo & Rivers State)

| 1.    | Fence in Project            | The LGA shall construct a perimeter fence around the project where necessary. The construction of the fence includes the following processes: | • Excavation of Foundation; 0.45m wide x 0.60m deep  
• Blinding and casting of foundation concrete; 0.15m thick (350kg/m³)  
• Construction of fence wall with 0.15m thick cement/sand blocks up to 1.8m above ground level.  
• Construction, installation and finishing of steel entrance gates of 3.0m wide for all projects and 1.20m wide for borehole/water tower | All Projects |
| 2.    | Construction of Toilets     | The LGA shall undertake the construction of Pour Flush Toilets for projects where toilet facility are required to complement the main activity and function of the project. The construction of toilets involves the following: | • Construction of a simple building with Cement/sand blocks, timber roof trusses and Alu-zinc roofing sheets with overall dimensions 6.0m x 3.30m. The building comprises of not less than 4 units of squat toilets, 2 no each for men and women separated with central hand wash lobby.  
• Excavate Foundation; 0.45m x 0.60m  
• Blind and cast concrete strip foundation; 0.15m thick (350kg/m³)  
• Foundation and structural walls; 0.15m full masonry blocks and finished trowelled cement plaster.  
• Roofing; hard wood trusses and covering in Alu-zinc roofing sheets  
• Doors; solidcore flush doors on hard wood door frame and fitted with appropriate locks.  
• Plumbing; Twyford or similar make ceramic squat toilet pans fitted on the floor and plumbed to Soakaway/Septic tank pits with PVC pipes and accessories.  
• Construct septic tank of 2.10m x 3.60m x 2.89m and finish to drawings details | Construction Projects |
| 3.    | Water Supply (Borehole with Hand Pump) | The LGA shall undertake the drilling and installation of borehole with hand pump for the supply of water to projects that require water to complement function. The borehole is construction shall include the following: | • Conduct geophysical survey (field work, interpretation and report) for the location of borehole at a suitable site.  
• Drilling of borehole in sedimentary formation (0-60m).  
• Supply and install 110mm diameter UPVC casings of 10 bar and 110mm diameter UPVC screens of 10 bar pressure rating; slot size 0.5.  
• Conduct water quality analysis (biological, chemical and physical) and borehole disinfection.  
• Install to designed depth an appropriate hand pump on a concrete plate form with bucket/users’ stand with drain troughs to waste channel. | Health centres, Agro processing and markets |
| 4.    | Construction of Drying Platform | The LGA shall construct a drying platform for warehouse projects and the drying platform shall be constructed as | • The drying platform shall be constructed of reinforced concrete 3.0m x 6.0m  
• Excavate foundation 0.45m x 0.45m  
• Blind and cast foundation concrete/beam 0.15m thick x 0.25m (350kg/m³) | Agro Processing |

</table>
|   |   | • Fill and compact with good quality laterite  
|   |   | • Cast 0.10m thick concrete with BRC reinforcement  
|   |   | • School Desk: 1.2m long double seater writing desk with integral bench unit.  
|   |   | • Teachers Table: 1.4 x 0.7 x 0.9m size  
|   |   | • Teachers Chair; 0.45 X 0.45m back chair with seat and back rest finished in foam and leather covering.  
|   |   | School Classroom Blocks  
| 6. | **Supply of Equipment** | The LGA shall supply medical equipment to the specification and approval of the Ministry of Health: Primary Health Care Department. The medical equipment shall include the following basic and minimum numbers of items: |
|   |   |   |   |
|   |   | **Patients' Requirements**  
|   |   | • Beds  
|   |   | • Drip stand  
|   |   | • Bedside locker  
|   |   | • Delivery bed  
|   |   | • Waiting chairs  
|   |   | **Staff Requirements**  
|   |   | • Consulting tables  
|   |   | • Consulting Chairs  
|   |   | • Examination bed  
|   |   | • Treatment kit  
|   |   | Health Centres  
| 7. | **Accommodation for Staff** | The LGA shall undertake the provision of residential accommodation for station nurses at the health post as well as head teachers at the projects. The accommodation shall comply with the following minimum specifications: |
|   |   |   |   |
|   |   | • Separate living and sleeping rooms  
|   |   | • Kitchenette  
|   |   | • Toilet  
|   |   | Health Centres and School Projects  
| 8. | **Construction of Incinerator Pit** | The LGA shall undertake the construction of an incinerator for agro processing projects. The incinerator shall be constructed in the following manner: |
|   |   |   |   |
|   |   | • Incinerator size; 0.9 x 1.35m  
|   |   | • Walls to be of laterite brick units, 2.70m high and with base window for fire and another at 0.9m for filling of waste for burning.  
|   |   | • Roof to be reinforced concrete resting directly on the walls with windows underneath.  
|   |   | Agro Processing Mills
